PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in Flutter mobile and web application development, Firebase integration, and MySQL database management. Proficient in building cross-platform Android and iOS applications using Dart and Flutter, including a full-scale ride-sharing platform with real-time GPS tracking and payment integration. Quick learner and analytical problem solver with strong communication and teamwork skills, eager to deliver impactful, scalable mobile solutions.

TECHNICAL SKILLS

Mobile & Web Development: Flutter (Android, iOS, Web), Dart, Cross-Platform App Development, UI/UX Implementation

Backend & Databases: Firebase (Firestore, Authentication, Realtime Database), MySQL, RDBMS

APIs & Integrations: Google Maps API, Stripe Payment Gateway, REST APIs

Tools & Version Control: Git, GitHub

Soft Skills: Problem Solving, Communication, Teamwork, Adaptability, Analytical Thinking

PROJECTS

Rydo — Cross-Platform Ride-Sharing Platform | Flutter | Firebase | Google Maps | Stripe

- Developed a comprehensive ride-sharing app for Android and iOS with real-time Google Maps GPS tracking, a custom bidding system, and Stripe payment gateway integration for secure in-app transactions.
- Built a dedicated admin portal for driver document verification and implemented Firebase Firestore to synchronize ride status, location, and notifications across rider, driver, and admin interfaces.

FitTrack — Fitness & Wellness Mobile App | Flutter | Firebase

- Built a cross-platform Flutter fitness app featuring personalized workout tracking, real-time activity monitoring, and a custom nutrition plan module for structured diet and exercise management.
- Integrated Firebase Authentication and Firestore to securely persist user profiles, workout history, and nutrition data, with dynamic UI updates using Flutter state management.

TaskFlow — To-Do & Productivity App | Flutter | Local Persistence

- Developed a cross-platform Flutter To-Do app with task categorization, priority tagging, due-date scheduling, and full offline functionality via local data persistence.
- Built interactive progress-tracking charts providing visual insights into daily and weekly task completion trends, with a responsive UI optimized for mobile and tablet screen sizes.

EDUCATION

Bachelor of Science in Computer Science | Superior University | Sargodha, Pakistan | Expected 2027

Relevant Coursework: Mobile Application Development, Database Management Systems, Software Engineering, Data Structures & Algorithms, Object-Oriented Programming
